Personal Profile

I am a mathematician with a PhD in Machine Learning. In my research, I investigated the learning capabilities of deep sequence models using formal language theory and functional analysis. In particular, I focused on improving the interpretability of deep learning methods for language modelling. I am a fast learner with experience in problem solving, data science and project management.

Education

McGill University   *Montréal, Canada*
PhD in Computer Science   *2016 - 2022*
- Thesis: *The approximate minimization problem of weighted finite automata and applications to language modelling: an approach based on Adamyan-Arov-Krein theory*
- Supervisors: Prakash Panangaden, Doina Precup.

Concordia University   *Montréal, Canada*
MSc in Mathematics, ALGANT Erasmus Mundus   *2015 - 2016*
- Thesis: *Deformations of Galois Representations.*
- Supervisor: Adrian Iovita.

Università degli Study di Padova   *Padova, Italy*
Master in Mathematics, ALGANT Erasmus Mundus   *2014 - 2016*
- Specialization: Algebra, Geometry, Number Theory

BSc in Mathematics   *2010 - 2014*

Work Experience

McGill University   *Montréal, Canada*
Postdoctoral Researcher   *2022 - 2023*
- Investigated the learning capabilities of transformers and their connections with models from formal language theory.
- Co-led the efforts and mentored the work of 3 graduate students.

Teaching Assistant   *2017 - 2020*
- Led tutorials and Q&A sessions with 50 students.

Université Jean Monnet   *Saint-Étienne, France*
Invited Visiting Researcher   *2023*
- Funded to work for a month at Laboratoire Hubert Curien

University of Padova, Board of Directors   *Padova, Italy*
Student Representative, BofD   *2015*
- Advocated for students needs, elected to represent ∼60K students.

Selected Publications

Optimal Approximate Minimization of One-Letter Irredundant WFAs
   Clara Lacroce* , Borja Balle, Prakash Panangaden and Guillaume Rabusseau
   Under review in the Journal Mathematical Structure in Computer Science (2023). 2023

Simulating weighted automata over sequences and trees with transformers
   Michael Rizvi* and Maude Lizaire and Clara Lacroce and Guillaume Rabusseau
   Under review at AISTATS 2024 (2023). 2023

Length independent PAC-Bayes bound for saturated Simple RNNs
   Volodimir Mitarchuck* and Clara Lacroce and Remi Emonet and Remi Eyraud and Amaury Habrard and Guillaume Rabusseau
   Under review at AISTATS 2024 (2023). 2023

The approximate minimization problem of weighted finite automata and applications to language modelling: an approach based on Adamyan-Arov-Krein theory
  Clara Lacroce
  McGill University (2022). 2022

Towards an AAK Theory Approach to Approximate Minimization in the Multi-Letter Case
  Clara Lacroce**, Prakash Panangaden and Guillaume Rabusseau
  CoRR abs/2206.00172 (2022). 2022

Extracting Weighted Automata for Approximate Minimization in Language Modelling
  Clara Lacroce**, Prakash Panangaden and Guillaume Rabusseau
  Proceedings of the Fifteenth International Conference on Grammatical Inference, 2021

Optimal Spectral-Norm Approximate Minimization of Weighted Finite Automata
  Borja Balle and Clara Lacroce* and Prakash Panangaden and Doina Precup and Guillaume Rabusseau
  48th International Colloquium on Automata, Languages, and Programming, ICALP 2021, July 12-16, 2021, Glasgow, Scotland (Virtual Conference), 2021

* Corresponding author.

Awards

Outstanding Teaching Assistant Award	McGill University	*2019*
Graduate Excellence Award	McGill University	*2017 - 2018*
Cryptoworks21 Scholarship	NSERC (Declined)	*2016 - 2017*
Armand C. Archambault Fellowship	Concordia University	*2016*
International ALGANT Award	Algant Consortium	*2015 - 2016*

Selected Invited Talks

The approximate minimization problem of weighted finite automata and applications to language modelling:
an approach based on Adamyan-Arov-Krein theory
- Laboratoire Hubert Curien, Université Jean Monnet, Saint-Étienne   *2023*
- Workshop Algorithmic aspects of dynamical systems, Barbados   *2023*
- Seminar on Formal Languages and Neural Networks (FLaNN), online   *2022*

Optimal Spectral-Norm Approximate Minimization
- QUALOG 2023, Boston   *2023*
- ICALP 2021, online   *2021*
- Online Worldwide Seminar on Logic and Semantics, Cambridge   *2021*

Towards an AAK Theory Approach to Approximate Minimization in the Multi-Letter Case
- LEARNAUT 2022, Paris   *2022*

Extracting Weighted Automata for Approximate Minimization in Language Modelling
- ICGI 2020-2021, online   *2021*

Community Service

Reviewer	Mathematical Structures in Computer Science, AISTATS2023, ICGI2023.	*2022 - Current*
Surgical Floor Volunteer	Montréal Children Hospital. Provided relief for babies post surgery.	*2019 - 2022*
Mentor	Collegio Mazza, Padova. Advised a group of women in their freshman year.	*2013 - 2015*

Skills

Programming	Python, Pandas, NumPy, Scikit-learn.
Software/OS	Git, Matlab, Unix, LaTeX, Microsoft Office.

Languages

English	Full professional proficiency.
French	Professional working proficiency (TEFAQ: Listening C2, Speaking C1)
Italian	Native proficiency.
